

Interactive Sworn Statement Program

This program is created in Excel and uses macros extensively. Therefore, you may need to change your macro security levels in Excel in order for the program to work properly.

To check your security level you should first open your Excel program with a blank workbook.

Select **Tools** ⇒ **Macro** ⇒ **Security**

On the “Security Level” tab choose “Medium” security. Once you change the macro security level, you will have the option to either enable or disable macros that are contained within the document you have selected to open.

Once you have changed the security level, open the document called Interactive Sworn Statement.xls on the enclosed New Construction Interactive Disc. When you open this file, you will get a dialogue box giving you the option to disable or enable macros. You **must** enable macros for this program to work properly.

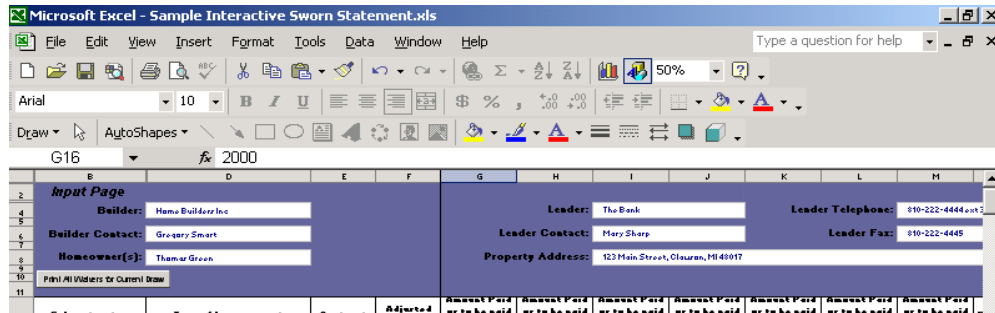

There are six available sheets in this workbook. This entire workbook is set to automatically populate, merge, and calculate all columns and rows once you enter the requested information. More detailed instructions will follow these brief descriptions below.

- Input Page
 - ◆ This is where you will input all the information relating to the construction project.
 - ◆ All the information entered on this sheet, will merge into other documents within the workbook (i.e. sworn statement and waiver).
- Sworn Statement
 - ◆ All of the information on this sheet will automatically populate from the information you entered on the Input Page.
- Waiver of Lien
 - ◆ The information from the input page will also automatically merge into the waiver when you hit the "print all waivers" button on the Input Page.
- Draw Request Input Page
 - ◆ This is an additional input page to be used to create a separate Mortgage Draw Request document which will reflect the total funds being requested from the loan proceeds.
 - ◆ All general information (i.e. subcontractors, improvements furnished, contract amount, and adjusted contract amount) will automatically merge from the Input Page. The only thing to enter in the appropriate column on this form is the amount of your current draw request.
- Draw Request
 - ◆ All of the information on this sheet will automatically populate from the information on the Draw Request Input Page.
- Blank Waiver
 - ◆ This sheet will give you the ability to print blank waivers if you do not need or want the information to automatically merge into the Waiver.

Input Page

At the top of the Input Page, begin entering information regarding the project (eg. builder, lender, homeowner, property address, etc). The information entered on this sheet will automatically merge into the Sworn Statement, Waiver, Draw Request Input Page and Draw Request. You should note that whatever you enter in the "builder contact" box is going to print beneath the signature line on the Sworn Statement.

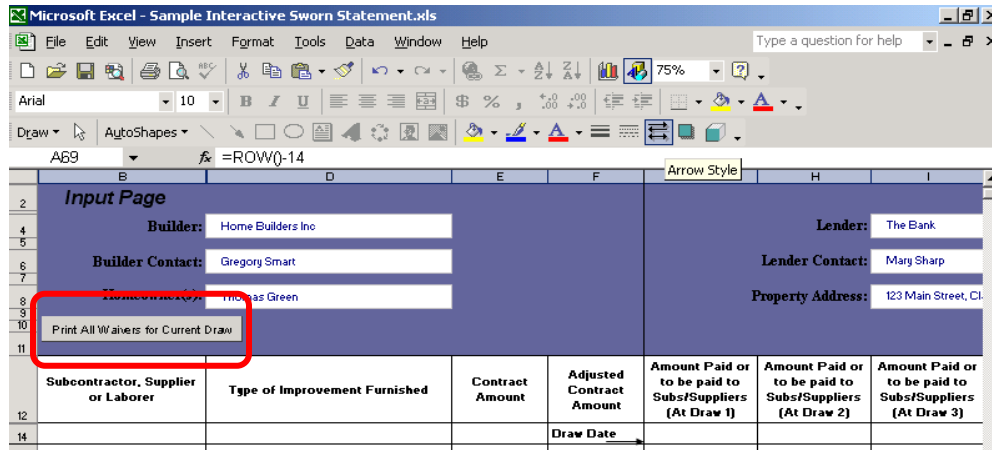

Then you can begin to enter the information that will appear on your Sworn Statement.

First, in column B (rows 16-155), enter the subcontractors and suppliers (you must also include each subcontractor and supplier's address and telephone number) for each improvement furnished on the project. **(Please make sure you press the "Alt" button and the "Enter" button simultaneously. Pressing these two buttons simultaneously will take you to the next line while keeping you in the same cell.)** We have provided you with a list of commonly used types of improvement furnished. If you do not see a description that fits the improvement you have contracted for, you have the ability to make changes to those descriptions but you cannot add or delete rows. Information entered in columns B and D (rows 16-155) will merge into the Draw Request Input Page so that you do not have to re-enter the information.

Next, in column E, enter the contract amount or estimated contract amount for each improvement furnished. Once this amount is entered, you should also see it in the "Adjusted Contract Amount" column. If there is an adjustment to the contract amount, the full adjusted contract amount should be entered only in Column F "Adjusted Contract Amount". **The contract amount column should never be changed.**

Once you have entered all the above general information, you should save the document for future draws. Suggested file names may be either the property address or the homeowner's name.

Be sure to save the updated version once you've entered all the information for the current draw. After reviewing the accuracy of the information you entered, you can print the waivers required for the current draw by clicking on the "Print All Waivers for Current Draw" button in the upper left corner of the Input Page. This will automatically merge the information into the waiver. By clicking on this button, it will automatically send the waivers to your printer without requiring any additional information.

Follow the same steps for each consecutive draw by entering the new amounts in the appropriate columns. The information from the previous draws will automatically move and recalculate on the Sworn Statement and Draw Request. You will only need to add the information for the current draw in the Input Page and the Draw Request Input Page.

Sworn Statement

When you click on the Sworn Statement worksheet, you will see that your sworn statement is complete. All the information you entered on the Input Page automatically populated your sworn statement and it is now ready to be printed.

To print the Sworn Statement, click on the printer icon.

The screenshot shows the Microsoft Excel interface with the 'Sworn Statement' worksheet selected. The printer icon in the 'View' ribbon is highlighted with a red box and an arrow. A text box above the screenshot says 'To print the Sworn Statement, click on the printer icon.' The worksheet content includes:

DEVON TITLE logo with the tagline 'Providing peace of mind'.

SWORN STATEMENT

Draw Request Input Page

This page only needs completion if you wish to print a Mortgage Draw Request Statement. The Subcontractors, Contractors and Laborers, the Improvements Furnished as well as the Contract and Adjusted Contract Amounts will automatically merge into this sheet from the Input Page.

The only thing you will be required to add to this sheet is the amount you are currently requesting to draw from the loan proceeds. Again, once you have entered all this information, make sure you save the updated version for future draw requests.

Draw Request - Input Page						
Builder: Home Builders Inc			Lender: The Bank			
Builder Contact: Gregory Smart			Lender Contact: Mary Sharp			
Homeowner(s): Thomas Green			Property Address: 123 Main Street, CI
